FIFA (Acronym for First-Person Interactive Football Simulation) is the most famous football (or soccer) simulator. Launched in September 1990 (the year before EA Sports came on the scene), FIFA boasted a catch-up strategy to arcade football games at the time, and was a pioneer in in-game and realistic full-motion video for gaming. EA Sports got its hands on FIFA and picked it up, ran with it, and kept playing with it. The stories have it that EA Sports was unhappy with the direction its game was taking and was forced to release an early version of FIFA Soccer in association with Electronic Arts. Some time later, the version EA Sports sold was cut up and sold in the shareware format to induce customers to buy EA Sports's version. FIFA's name was changed to World Sports Soccer, and its lineup was reduced to just six teams per hemisphere (Europe and the Americas, at the time). As official FIFA licences reverted to its original, original name - FIFA - an in-game update of the original Xbox version of FIFA World Cup 98 was released. Also, or later on, football (or soccer) quickly became its own sport, and this has been supported by EA Sports, being more focused on developing the actual game rather than the mode. FIFA remained a "team-based football game" for many years, and this continues to some extent (except in UEFA competitions, like Euro 2012, where FIFA was granted the license to use the UEFA logo and they are signed up to the ECA). FIFA has been a name synonymous with football (or soccer) simulation since its first release, and it continues to capture the hearts and minds of the world's players. 1st FIFA Soccer on the Amiga The original versions of FIFA were released for the Amiga, MSX, Atari ST and ZX Spectrum. The first was released in 1992 on the Amiga, based on the Codemasters
